

Annual update; +3,3%
Pension contribution: -0,3%!

Luxembourg, 3rd November 2016

In the 2014 Staff Regulations there is one good thing: automatic adjustment of our remuneration. It's one of the rare measures which are in favour of staff.

This year, on the basis of the evolution of prices and purchasing power in the national civil services, our remuneration will be increased by 3.3%.

Further to this increase, one must add a reduction of our contribution to the pension scheme, which will go down from 10.1% to 9.8%.

USF-Luxembourg wishes to remind you that this positive development is following a period of either incomplete adjustments (2011 and 2012) or barely a freeze of our salaries in 2013 and 2014. Therefore, we are far from catching up the loss.

Given the growth of the Union GDP and the fact that the specific indicator does not exceed 2%, no moderation or exception clause can be activated.

You may find attached a table indicating the future salary grid and a more complete technical information.
